---

Gary,

I have marked on the attached map the location of the pesticide storage area based on my understanding of where the inspector stated the pesticides were. This is the general vicinity and may not be exact.

I hope it is helpful.

Janet

Janet,

Could you guys take a look at the picture and draw on it and send it back to me. Based upon your information, it is located by the scales but I wanted to pinpoint the location the best I can. If you could scan and send back to me, that would be wonderful.

Thanks

Gary Moore

Gary,

You should have received a message from me stating that our inspector will be providing whatever information she can. I corrected the message to have her send me the information and then I will send it to you.

Janet

**Janet:**

**I am sending you a kmz file that can be double clicked and installed on a google earth program that you have installed. We have talked with the Texas State Chemist and they have identified the location of some of the chemicals and areas on the site. We are very interested in the location of the pesticide/herbicide/funjicide storage for the facility. I would appreciate it very much if you could let us know where that storage would have been located on the property.**

**Thanks**
